

CAMP LA JUNTA

Daily DO #2

HOW TO MAKE THROWING STARS

Written Instructions:

Step 1: If you're starting with 8.5x 11 paper, fold it over as shown to create a square. Cut off the excess. (you will need 2 pieces of paper)

Step 2: Fold each square piece of paper in half to make a crease down the center.

Step 3: Open the paper back up. Then fold each side over to the center line. Do this with both squares.

Step 4: Fold each piece of paper in half again.

Step 5: Now fold each paper in half length-wise for the purpose of making a crease.

Step 6: Fold the top half over so that it lines up with the crease you made in step 5. You want the papers to be folded the opposite direction from each other.

Step 7: Fold each bottom half over to the side in the same way, but go the opposite direction.

Step 8: Flip over each paper. Fold the ends in toward the center as shown. S

Step 9: Lay the papers on top of each other as shown. You'll want like sides to face each other.

Step 10: Fold the top right yellow point over and tuck the edge under the green as shown. The fold will be on the crease line that you see in the photo above.

Step 11: Fold up the bottom yellow point in the same way.

Step 12: Flip over the star and fold in the green points the same way.

Step 13: When you tuck in the final point, the star should hold together like this.
