

CAMP LA JUNTA

# Daily DO #10

## EGG DROP

### Materials:

Egg - 1 per person

Brown paper bag - 1 per egg

Duct Tape or any tape you have around the house

Items/Material Found in Nature

- Leaves
- Sticks
- Grass
- Bark
- Moss
- Bugs

### Directions:

- Collect natural materials (leaves, sticks, grass, bark, moss, bugs, etc.)
- Create a protective egg container with your brown paper bag (can only use found objects and tape)
- Once all items are placed in the bag, find a safe, but tall place to release your egg from.
- If you don't have a tall place at your house, then you may throw your bag up in the air and let it fall to the ground.
- After you have released your egg and it hit the ground, check to see if your egg survived the fall.
