## TRASHETBALL

### What you Need:

Tape  
Scissors  
Pencil/Pen/Marker  
Ruler  
3-4 Pieces of Paper  
Carboard

### How to Make:

Cut out your backboard from the carboard. Can be any size, just matters how big or small you want your backboard to be.

Fold one piece of paper to make your rim. Make a fold one inch long on the top side of your paper. Continue to fold the paper over itself on the first fold you made until you have a long, flat one-inch piece of paper.

Attach your rim to your cardboard backboard. Put one side of your rim on the backboard and surround/brace your rim to the backboard with tape. Then take the other end of the rim and attach it to the backboard. With both sides attached to the backboard, you then will be able to form your rim into a circular shape.

Make the ball for your goal. Take one piece of paper and ball it up. Then take your second piece of paper and form it around your previous made ball. Make sure you pack it in and make it super tight.

Hang your goal in your house on any door, rafter, wall and railing that is safe to use. Ask your parents where you can hang it first. Use your tape to attach the goal to where you will hang it at.

### What to Play:

Play a game of horse/pig with your family to see who has the best shot in the house.
