

CAMP LA JUNTA

Daily DO #37

SKEE BALL

What You Need:

- A good size card board box
- Scissors or a Knife (something to cut with)
- Duct Tape
- Balls
- Some things to catch the balls - Laundry Baskets, Buckets, Pots, etc.
- Something to keep score with (pen, paper, chalk board, etc.)

Construction:

To make the ramp, cut down the long sides of the top from the box. You can put something under the flap to keep it strong so it doesn't bend. Tape the sides down so they lay flat and flush with the box. To raise the ramp a bit and allow the ball to launch better, put a shoe box or something under the end.

Game Play:

To play the game, simply roll the balls up the ramp and launch them into the laundry baskets or whatever you have to catch the balls. Use multiple items to catch the balls and be sure to give them different point values. Further or smaller items should be worth more than the closer and larger receptacles.
